

October 14 2014

Doctor Messias,

I just wanted you to know how much I truly appreciate all that you and your experience is providing me. With every procedure and every follow-up appointments with you, I find myself feeling better and in much added control of my pain. Your dedication to your profession, has given me a quality of life in lesser pain where two years ago I didn't know what else to do. You take time with me every single visit to 'listen' and to "hear" me where other Doctors have not. I feel comfortable and far less anxious with you at the helm more so than I have with any past experiences. I know you are a person with his own life outside of your workplace and with that comes highs & lows, yet, you never show anything but encouragement and your entire team makes going to the Doctor actually pleasurable. Thank you for all that you do. Respectfully, Dr. Star Ede
